Where IT Gets Done.

## GCS Removes Cloud Complexity

### Choose between SecureCloud Flex or CompleteCloud Flex Bundles

As more companies seek to leverage the power of the cloud, they often don't know how or where to begin. Understanding the features, licensing and additional services required can quickly confuse those who are unfamiliar with all the options.

After helping hundreds of customers in their cloud journey, GCS has identified two cloud packages that provide a simplified bundle of best practices. These packages provide the perfect mix of consistency and flexibility.

### The **SecureCloud Flex** Bundle

This basic plan offers security monitoring and management to keep your users, data, and devices safe both on-premise and in the cloud.

#### Key features and functions include:

Monitor sign-ins for account breaches and applications for potential breach and data exfiltration

Protect endpoints from malware and breaches

Receive monthly security posture review and guidance from a dedicated security expert

Manage the security of your Microsoft cloud tenant and on-premises environment

Contact [flex@gcstechnologies.com](mailto:flex@gcstechnologies.com) to begin controlling your IT expenses.

# The CompleteCloud Flex Bundle

This comprehensive, all-in-one package includes all the benefits of our SecureCloud Flex plan plus Helpdesk support, and Microsoft365 subscriptions.

## SecureCloud Flex Features

Security monitoring and management

Endpoint protection

Monthly security review and guidance

## Additional CompleteCloud Flex Features
